Bhopal, Madhya Pradesh, India

Computer Science Engineering Student specializing in AI/ML holding a CGPA of 8.15 at VIT Bhopal. Skilled in Web Development and AI projects, with top placements in hackathons like Adobe GenSolve. Proficient in C++, Python, HTML, JavaScript, and Node.js.

EDUCATION

Sep 2023 - Present
Current CGPA : 8.15

B.Tech, VIT Bhopal University
Undergraduate in Computer Science Engineering with specialization in Artificial Intelligence & Machine Learning

ACADEMIC PROJECTS

Oct 2024 - Present

VITRAVEL : An Online Cab Booking Web Application

HTML, CSS, JavaScript, Tailwind CSS, Bootstrap, jQuery, Node.js Express.js, React.js, PostgreSQL

The goal is to develop an online cab booking platform where users can quickly book cabs, track rides, make payments and view booking history. The website should have user-friendly interfaces, reliable backend services, and secure payment and authentication system. Smart Route Optimization: An AI-based route optimization system that analyzes traffic conditions, time, and distance to suggest the fastest or most cost-effective route. This could leverage Google Maps APIs or similar services along with machine learning algorithms.
